Amidakuzi(a	lot)	
[Amidakuzi Is Fair ?]		
Amidakuji is randomly created each time. The position of the red dot on the top is the hit. Suppose you choose the bottom edge of the Amidakuji line. It counts the position of the lower end that hit and displays the number of hits in a bar graph. Touch the screen five times to activate. The lottery for Amida will stop automatically. If you touch it further,it will be initialized. When the screen goes dark,touch the title bar ! Copyright(C) Sohun 2021.9.18

[Outline]

Randomly make Amidakuji with 10 vertical lines and 50 horizontal lines.

The hit position is the third from the left.

Is Amidakuji the same ease of winning no matter where you draw it ? Or is there a position that is easy to hit and a position that is hard to hit ? Let's draw lots of Amidakuji many times and observe the situation.
